Backaches

Indicates kidney trouble. GIN PILLS give prompt and permanent relief as they act directly but gently on the kidneys—soothing, healing and strengthening them. See a box of at drugists.

WORLD HAPPENINGS BRIEFLY TOLD

Alarmed by a rapid increase in the use of opium through Manchuria, the Manchukuo government is opening a chain of clinics in Mukden, Changchun, Kirin, Harbin, Antsien, Nenchow and Jehol City, where drug addicts may receive treatment free.

Outside the United Kingdom, Toronto consumes more per capita than any city in the world. C. E. Lough, member of a firm of British tea merchants, states in per capita consumption, he added, Canada stands third among countries.

Over 10 per cent of the male population are more or less color-blind, according to the conclusions reached by a committee which has been investigating color-vision requirements in the Royal navy.

A hollow statue of Mussolini is to be erected atop of Rome's seven hills, and devotion to Italy is to be platform in the home where they will be permitted to "see the world through Mussolini's eyes."

Two air mail extensions in the North West Territories will be inaugurated during the winter, with Copestake and Casswell River established as the new receiving postal stations.

Lord Willington, viceroy of India and former Governor-General of Canada, is to be in London in the spring. He is going home on personal leave, which will probably be of the usual duration of four months.

A. Perley, pioneer hotelman, who died in Calgary recently, has left the residue of his estate, \$125,000, to the City of Calgary hospital.

Almost all commodities moving out of Vancouver to world markets during the first nine months of 1933 show an increase over the corresponding period of 1932, according to a report issued by Port Superintendent R. J. Burns, of the harbor board.

Dr. Donald John Armour, a native of Cobourg, Ont., who became one of Great Britain's most noted brain and nerve specialists, died suddenly at a meeting of the Medical Society, London, England.

Famous Surgeon Dead

Canadian One Of Great Britain's Most Noted Nerve Specialists

Dr. Donald John Armour, a native of Cobourg, Ont., who became one of Great Britain's most noted brain and nerve specialists, died suddenly at a meeting of the Medical Society of London recently.

The fifth son of Hon. John Douglas Armour, former chief justice of Ontario, Dr. Armour had won such honors as C.M.G. (1918), F.R.C.S., M.R.C.P. and B.A., M.B. (Toronto). He was educated in Canada and England.

Dr. Armour was surgeon to the National Hospital for Nervous Diseases, an honorary lieutenant-colonel and consulting surgeon to the West London Hospital as well as to many other institutions.

Hints For Drivers
All of us might take an example from Admiral Byrd in the matter of useful Christmas presents. He likes, or he takes, a 10,000-mile ship, or a couple of thousand tons of coal, or 20,000 tons of pig iron, instead of candy and perfume.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is happy, healthy, wife and mother she will thank you.

W. N. H. 1918

Armament Dispute

Discusses Issue Between British and German Foreign Ministers
The government has issued a white paper, which it learned authoritatively, was aimed at settling the dispute on disarmament negotiations between Sir John Simon, Secretary for Foreign Affairs, and Konstantin von Neurath, the German Foreign Minister.

The document merely put into permanent and official form by the published reports regarding the disarmament bureau meeting in Geneva on October 14, and an exchange of telegrams between Sir John and Baron von Neurath concerning Germany's withdrawal from the armament pact.

The main point at issue between the British and German foreign ministers was whether Sir John had accurately interpreted Anglo-German conversations in London, October 6, to American delegates and others.

Peat in Fraser Valley

Several Large Farms Furnish Unusual Source Of Income

Farmers of the Fraser Valley, British Columbia, have an unusual source of income in their peat fields. The peat is cut in the summer and stacked into picturesque piles which are used to dry in the sun. Later the peat is removed to air-drying barns and when in ripe condition it is treated by machinery for poultry litter, for horticultural and nursery purposes and for insulating in building requirements. There are several large peat farms in the valley. One is in Surrey, one in Pitt Meadows and another in Lulu Island.

Grasshopper Destruction

Severe Outbreak Next Year Seems Almost Inevitable

There seems to be a rather widespread belief that, in spite of the fact that grasshoppers were very abundant during the summer and fall of 1933, no serious outbreak will occur in the spring of 1934. The available facts, however, tend to prove the contrary.

Natural Resources Commission

Saskatchewan and Alberta Seeking Compensation For Alienation

Mr. Justice Bigelow has been named as the Saskatchewan member of the commission while Alberta will be represented by Mr. Justice Tuckey.

Announcement that the two provinces would make joint representations to the federal government was made by Hon. M. A. McPherson, Attorney-General, and Provincial Treasurer for Saskatchewan.

He stated that the commission would likely consist of five members and would adjudicate on the position of both provinces. The Dominion government, he believed, would likely name a representative for each province and the federal government would likely agree upon a chairman.

Rapid Advances In Rail Engineering May Revolutionize Present Transportation Systems

It will make some folk feel sad to know that the rail is coming fast when the present crack railroad trains of the country will look old-fashioned. The engineers who plan ways to carry humanity across the land at bird-like speeds with less expense and more comfort have spelled the doom of the grand locomotives and heavy cars of the past. It is only a matter of weeks before passengers on the Union Pacific may be whizzing along in trains that look somewhat like long silver eels. Models of the "railplane" and other modern forms of transportation have attracted crowds at the Chicago Exposition. Discussing these advances in rail engineering, the October Review of Reviews says that one of the new type trains will be sliding along the steel road before the year is out.

Speed alone has not been the end of the quest in railroad science. The old problem of the multiple longer distances for less money is still the pressing problem of the nation's rail lines. New aluminum alloy trains pulled by a 600-horsepower locomotive in the built-head locomotive may make the difference between profit and loss in passenger service. It is a scientific achievement, this silver eel on rails, as well as a long jump to new efficiency.

Streamlined to glide through the wind, three cars of the rail-plane, including the "power plant" in the lead, will weigh in at less than 200 tons more than a Pullman sleeper. The train stands eleven feet from the ground. Its "pilot" body looks not unlike that of an airplane. It will make ninety miles an hour as its ordinary running speed. The new horsepower requirements markedly compared with trains of present design.

Another rapid rail vehicle is the autotrain, which has been used abroad and has 10,000 miles of actual service to support its reputation for fast and inexpensive travel. Built of aluminum, run by a sixteen-cylinder gasoline engine, it is designed to serve passengers in units of one car or more. Its slim lines and round profile give it power to overcome wind resistance at high speeds. New York Sun.

Triumphed Over Difficulties

With Three Fingers Missing Organist Wins First Music Test

Although three fingers are missing from his right hand, Reginald Silby Lewis was among the successful candidates at the last examination for the associationship of the Royal College of Organists. His success is a story of triumph over exceptional difficulties. His right hand was injured at Ypres, where he was an artillery officer, and it was feared his ambition as an organist was ended. However, after several operations in hospital he "came back," and passed his examination without any concession.

He had studied law for a while but music was his natural bent. His success is a triumph of will as well as musicianship, the examination for the associationship of the Royal College of Organists having been almost a fantastic objective at first, and now Reginald Silby Lewis holds the diploma of the world's leading school of the organ.

Where Scientists Differ

Great Strain In Figures Giving Size Of Universe

How big is the universe? Anywhere from 75,000 million miles to more than one trillion miles across. These are the smallest and largest estimates in official figures now being given by the Institution. The estimates of 75,000 million (75 plus 18 ciphers) is that of Dr. Willem De Sitter, noted Dutch astronomer, while the figure of one septillion (114 plus 22 ciphers) is credited to Dr. Edwin Hubble, astronomer of Mount Wilson Observatory, California. If Dr. Hubble is right, it would take an airplane, flying 100 miles an hour, more than one septillion years to cross the universe.

Gravel Averaging To Cut

Gravel in the state now being sold from the citizens of Arizona, for ordinary government purposes. Five cents is the lowest price. The state of Arizona will earn the sum of \$75,000,000, "Active Patriot," of El Paso, California, and 423, "Super-Duper."

Between 50,000 and 60,000 tons in the United Kingdom depend on the 500-ton inventories for their fuel and a much smaller amount.

Irigrating From Air

Experiments With Russian Invention Have Proved Success

Irigrating of the land from the air is said to be possible by a new apparatus invented by the Russian Hydro-Technical Institute and the Lenin Academy of Agriculture. It consists of those which is carried in gas-filled balloons. The hose is attached to two tractors, the water being pumped into it from an irrigation canal and sent through sprays to fall on the earth like rain. Experiments of this kind of irrigation with a much simpler apparatus on the ground, were carried out last year on a Russian State farm in Central Asia, the Palko-Aral. The crops so watered gave a yield of 300 per cent. greater than those watered by the canal system. The yield of winter wheat was more than doubled. The new system also will effect a great saving in the carrying and maintenance of irrigation canals and will set free a large area occupied by them.

Women In Business

Efficient As Men And More Loyal States Sir Charles Higham

Women play a big part in the future as collectors of income-tax in the reorganized collection service at Somerset House. It was the last branch of income-tax work to which they were admitted, and now nearly every woman the appointment of a woman to the collector is announced.

Sir Charles Higham, speaking at an exhibition recently, said he disagreed with Sir Herbert Austin's view that it would be better for industry if women were sent out of business and back to their homes. Women were as efficient as men and were certainly more loyal, he said.

Winnipeg Newspaper Union

Winnipeg, Man., Nov. 17.—The Winnipeg Newspaper Union, which was organized last night, is the first of its kind in the province. It is reported that the union will have a hand in the rescue and first-aid work. He had done so he would have been a member of a society and been liable to sharp punishment. A society must never let go of a society. These are the cardinal duties of a society. No matter what happens, unless it is in the course of his immediate military duties, he must ignore it and carry on.—St. Thomas Times-Journal.

Fog-Proof Signals For Roads

Fog is defined on the new electrified railway between Barking and Urmston, in England, "Searchlight" signals cast a beam for 1,000 yards and so foolproof is the system of signaling that when a train passes a danger point it immediately shows its order itself back again into safety.

Trinidad expects an early increase in employment.

PROFESSOR EINSTEIN'S MODEST ARRIVAL

Unannounced by any fanfare, Professor Albert Einstein, world-famed German scientist, a virtual slave from his native land, where he aroused the ire of the Nazis, is pictured as he left the New York Harbour, where he was taken by tug to Jersey City. Einstein left for Princeton almost immediately after his arrival here.

Cattle Revert To Type

Strange Stories Told About Wild Herd On Graham Island

A good example of what happens when domestic cattle revert to type is to be found on some of the islands which make up the Queen Charlotte Islands, scattered along the outer reaches of the coast of British Columbia. Cattle which have gone wild on these islands have multiplied remarkably and loggers, sailors and fishermen who occasionally land there tell strange stories of their doings.

On Graham Island, largest of the Queen Charlotte group, are wild cattle the descendants of good type dairy and beef breeds which answer the query sometimes propounded as to what type would be produced from domestic cattle left alone in suitable surroundings.

The Hudson Bay Co. owned the first lot of cattle turned loose on Graham Island, around a century ago. They went from Fort Langley in the Fraser Valley. Thirty years ago the Hudson Bay Co. closed up operations on the island leaving three more cattle, largely of the same blood.

Hereafter went to the island, a group of a settler named Cesare, and there they remained. When Cesare pulled stakes and quitted the island he left some of his Herefords.

A settler named Bales subsequently took some Aberdeen Angus cattle to Graham Island and when he left some of his blacks stayed behind. A settler now living near Lac La Poudre took in Jerseys, and later still some of his blacks stayed behind.

Now there are around a thousand head of wild cattle on Graham Island, which resemble the buffalo. They are as fleet as deer and have developed, according to T. G. Stewart, Dominion live stock inspector for B.C., long legs, heavy shoulders and lithe bodies.

Cardinal Duties Of A Sentry

Must Never Let Go Of His Rifle Or Leave His Post

An crowbaiting the changing of the guard at Buckingham Palace, killing or attempting to injure a number of others. Among those who were killed was a sentry, one of His Majesty's Guards, and it is reported that he picked himself up and resumed his rigid position.

It might be thought by many people that the soldier should have given a hand in the rescue and first-aid work. He had done so he would have been a member of a society and been liable to sharp punishment. A society must never let go of a society. These are the cardinal duties of a sentry. No matter what happens, unless it is in the course of his immediate military duties, he must ignore it and carry on.—St. Thomas Times-Journal.

Ball Caine's Last Book

Sir Hall Caine's "Life of Christ," considered to be one of the most amazing literary efforts ever attempted, is ready for publication in London. When the famous novelist died in 1931, he left a manuscript of 3,500,000 words, equal to 60,000 volumes. Every word of this is as Hall Caine wrote it.

China realized nearly \$500,000 from its first national lottery.

Limited Population Does Not Guarantee Prosperity

Intelligently Directed Immigration As Times Improve World Benefit Canada

Canada is far from being an overcrowded country. There is plenty of room for new population, new business and increased production. Intelligently directed and carefully selected immigration should not add to unemployment, and might indeed aid in its solution. The industrial machinery of the country is capable of providing for the needs of far more people than the ten million now within our borders.

There is a danger that the depression may give birth to unwise views regarding future expansion. While the present is not an opportune time to inaugurate an immediate immigration scheme on a wholesale scale there is sound sense in what Premier Bennett said recently on the subject when he pointed out that Canada's vast area and rich resources required a great population for development. Development is essential to a full realization of the prosperity that is inherent in the country. The mineral resources of Northern Ontario have been an important factor in helping to weather the depression. There is in that area an illustration of the possibilities of the future.

A population of itself is no guarantee of prosperous conditions. It is not to be supposed that if Canada today had twice the present population unemployment would be any greater proportionately than it is now. A large number of new citizens could not be suddenly absorbed into the economic life of the country. It is true, but with a return of normal conditions it will be of advantage to include in the policies of the country reasonable measures for a sound and steady growth.—Toronto Evening Telegram.

Family Record Of Chinese

Some Can Be Traced Back Over 4,000 Years

It is a matter of amazement to the western world that a young woman who had just been married in China is a descendant in the 71st generation to the great founder of Confucianism. If she traces her family record back only to the birth of Confucius, it covers 2,461 years, but Chinese historians profess to carry it back over 4,600 years. Yet, the shorter period of nearly 25 centuries is enough to stagger the imaginations of the 11th generation descended from Roger Williams or the Pilgrims.—Providence Journal.

Blights For Blind Gardeners

Booklet By Hints From Tolls What Can Be Done

"Gardening for the Blind" is the title of a booklet issued from the office of the National Institute for the Blind, Great Portland Street, London. It is a booklet for the use of blind gardeners. Just what a blind person can do in a garden is told in this booklet by blind men. One of them says: "During the past 12 years of total blindness, I have produced numerous primary vegetables to maintain an ample supply of all kinds for domestic use all the year around." But how can weeds be distinguished? A blind gardener tells us: "The position of a weed is a good guide. The plants in the beds are known as they are placed in rows or clumps, it follows that any plant which is out of alignment is, for the most part, a weed." And here we have it to what would appear to be the most difficult of gardening tasks for a blind person—moving the lawn—though the writer calls it "the most pleasant of weekly jobs."

He admits that "it is not possible to cut grass in cutting grass a straight line," but considers this unnecessary. "A little practice will enable one to detect the difference in sound between the whirring of the blades when cutting or when reverting freely."

Weaver's Shuttle May Soon Become Obsolete

Machine Which Dispenses With It Has Been Invented

The weaver's shuttle is one of man's devices, and now it seems likely to become obsolete. For thirty years experts have been trying to invent a weaving machine which could dispense with it, and at last looms are on the market. Silk and cotton will undoubtedly follow. A shuttle travels from side to side across and through the warp, carrying the weft yarn with it. The new method is to use a light rod of aluminum alloy to take its place. Each rod is fitted at the end with a gripper which carries the weft half way across the warp and transfers it to the gripper of a rod which has come halfway across from the other side. This second rod draws the thread across and the process is complete. Much elaborate mechanism is dispensed with, and is reduced, and a greater variety of patterns is possible by the new method. Seven colors can be used in the weft of a shuttleless machine instead of the present maximum of four, and where one man is fully occupied in the present loom weaving to six.

Before marriage a man declares he will be master of his home or know the reason why. After marriage he knows the reason why.

British West Indian lines are to be introduced into this country.

Incomparable Treasure Of Antiquities Is Displayed At The Royal Ontario Museum

Look While They Listen

Television Sets Owned By Many People In British Isles

Three thousand people in the British Isles now have television sets. They look-in as they listen to the B.C. television broadcasts sent out four times a week from Broadcasting House, from 11 p.m. to 11:30 p.m. Many of them have bought complete sets. These are now on sale from five guineas to 50 guineas (\$25 to \$250).

They see people singing, dancing and drawing cartoons. They have watched a television play. The fascinating images measure in most of the sets, four inches by two or nine inches by four.

Now there are signs that television will take a quick jump forward in technique and popularity, with the use of ultra short wireless waves.

For television is a plotter. It demands more space in the ether before it will improve, and it cannot get that space in the overcrowded "air" of the ether where so many thousands of ordinary radio stations.

This congestion is one reason why the latest television broadcasts are often off till nearly midnight. And the latest, in turn, is stopping more "seeing-eye" men. The nations of the world are setting their radio scientists to solve the new, almost deserted part of the ether that is open to ultra short waves.

America and Germany have made the most progress, but Britain is well in the lead.

The Best of Canada Is Under Debt

to Ontario because of the establishing in Toronto of the Royal Ontario Museum for which a magnificent new institution has been recently been opened by the Provincial Government. The eastern press quotes from the London Times the opinion of an expert, "Outside London and the national museums of the British Isles generally, possibly the finest collections have been found at Toronto, where the Royal Ontario Museum, the largest of all the Dominion museums, has not only incomparable Canadian collections but also would furnish a collection of Chinese antiquities and art." At the official opening this statement was supported by the remarks of the secretary of the British Museum and the secretary of the Smithsonian Institution at Washington.

Ontario's institution has five departments, archaeology, geology, paleontology, a planetarium, and the Ontario Museum, of the heads of these departments Prof. C. T. Curran, F.R.S., is the best known with his seal for his job and his ability to make the bones of the past clothe themselves in glowing flesh.

Should a museum, which under the act providing for its foundation and maintenance must have three trustees, be a museum of Toronto among its trustees, Ontario is saving for all of Canada many echoes of a far part of this Dominion. It is a part of the history of other lands and other times.

It should also prove an inspiration to the people of the world, through the universities or in some governmental connection have begun the work of a fascinating adventure of building up a museum—Winning Free Press.

Tops Glasgow Market

Calves From Alberta Brought Good Price At Auction

One more example of why it pays to breed and feed the best is given by the news that a recent shipment of fed calves from Alberta made the highest price obtained on the Glasgow market so far this year. This baby lot was bred by George Ross of St. Kitts, fed by Charles Aspinall of the School of Agriculture at Raymond, Alberta, and when sold weighed 868 pounds.

Shipped overseas by A. Muir of Montreal was sold in Glasgow at auction by Neil Ritchie, British agent of the Southern Alberta Co-operative, and brought 119, 15s., or about 11 cents per pound live weight, netting back to the feeder 75 cents per pound.

Prediction Came True

The Earl of Durham's prediction in 1835 that full self-government would come to a united Canada in which both races, British and French, would take their part, long ago proved true. The Earl was making his forecast in 1835, the year of the first settlement of the people of Canada after making his report on the unfortunate trial of the rebellion and the rebellion of 1837. He appealed to Canadians to have faith in Britain's principles of freedom.

Wine Celler Under Church

The old university town of Heidelberg, so rich in attractions, possesses one known to few visitors. It is a wine cellar under the Catholic church of St. Anna, containing among other large casks, the "Jubilee Cask" of 1860, the 50th anniversary of the university, with a capacity of 4,912 gallons.

Soup making is becoming modern and scientific in India.

London's railway lines now cover 197 miles of routes.

Mrs. A. Schwartz left on Saturday last for Vancouver.

Mr. and Mrs. H.C. Willson and Mr. and Mrs. Tom Harvey motored to Calgary last Thursday.

Don't forget the LODGE dance at the Farmers' Exchange hall tonight.

Mrs. W. Poxon was a business visitor to Calgary on Thursday last.

A number of teachers in the district are attending the teachers' convention in Calgary this week.

Mrs. Bowman of Vancouver, an old-time resident of Carbon, arrived in town on Tuesday evening and is re-joining acquaintances.

Mr. and Mrs. Jas. Smith returned to Carbon on Sunday evening.

George Trepanier had his pure bred Guernsey bull into the stock sale in Calgary last week. Great interest was shown in the breed and it is understood that a deal has been made for the animal.

W. Poxon of the Red Bus Lines took a number of Carbon Misses to Calgary on Tuesday afternoon.

Alex Reid attended the stock show and sale in Calgary last week. Mr. Reid had some pure bred sheep at the sale.

Messrs. S. N. Wright and L.B. Hart left last week for Winnipeg to attend the annual meeting of the United Grain Growers, as delegates from Carbon and Swallow respectively.

Special Evangelical meetings will be held in the Gospel Hall, beginning tonight, and continuing nightly, except Saturdays. Meetings will commence on Sundays at 7:30, and week nights at 8 p.m. Speakers are D. R. Scott and Hector Alves of Vancouver.

A special memorial day service will be held in the Anglican Church, Carbon, on Sunday November 12th, at 7:30 p.m. All returned men and their families are cordially invited. Rev. J. R. Davies will conduct the service.

John Atkinson spent a few days in Calgary last week attending the Avondale Shortbush Club annual meeting, as well as taking in the stock sale.

Ice making has commenced at both the carling and skatting rinks and with cold weather it will not be long before these winter sports are under way.

Jas. W. Baird of Calgary was a business visitor the first part of the week.

A. F. McKibbin is having new light fixtures installed in the drug store, bringing his place of business another step nearer to those of the large cities.

We have had more snow the past week and also more warm weather, then a little more snow. The weather remains unsettled.

Counter check books are now selling at the lowest price in history. A war is on among the manufacturers and the prices are just half what they were a few weeks ago. Now is the time to stock up in this line. These prices will not continue for long. The Carbon Chronicle is local agent for all the leading manufacturers.

Mr. Bridgmore: "Did you make that split pea soup for dinner?"

Mrs. Bridgmore: "Yes, started it, but we can't have it until tomorrow. It's taken me all day to split the peas."

"This new dew we have at the house for a pet is just like one of the family!"

"Which one?"

Just for curiosity's sake, try a dose-up of your complexion. Are you surprised at what you see?

Is there a tendency towards dullness? A line or wrinkle here and there? A suggestion of "dumpy"—even "coarseness"?

Don't dodge these questions! It's important that you know the truth, if you expect your skin to be attractive to others.

Begin at once to secure this complexion fairy, OUTDOOR GALS' GLOW-GO Face Powder will help you. The luxurious powder helps you dry touch the delicate, softly-shaded skin which your face needs to retain soft, smooth and supple. With just a few applications, you can give your complexion a new look and loveliness.

You cannot buy a better powder than OUTDOOR GALS' at any price. The Good Housekeeping "Seal of Approval" is your guarantee of quality.

OUTDOOR GALS' Face Powder and other Gals' Beauty Products are sold by leading drug, department and chain stores in 5 sizes only by 1/2 lb. and 1 lb. If you want to sample free of the most popular OUTDOOR GALS' preparation, mail the coupon below.
